

Orange Juice Communications has received funding by means of sponsorship, including from pharmaceutical and medical technology companies, to support the delivery of the Insulin Safety Week campaign. Insulin Safety Week 2026 has been funded by Roche, MiniMed, Sanofi and Ascensia which have had no input into the campaign's arrangements or content.

CDEP does not receive funding for its participation in Insulin Safety Week and delivers its training independently.

For #ISW2026, learn more about the
latest in diabetes technology!

Sign in to CDEP
from **11-17 May 2026**
for FREE ACCESS to:
**Hybrid Closed-Loop
(HCL) Therapy**

This topic is an **introduction to Hybrid Closed-Loop (HCL) therapy**, the **different types of HCL systems** available and their **use in people living with type 1 diabetes**.

- The training is suitable for all health and social care staff.
- Sign in 24/7 from any computer, tablet or smartphone.
- The topic takes as little as 30 minutes and can be completed in bite-size chunks.
- The completed topic generates a CPD certificate and reflection document for revalidation.

Close the Loop on Insulin Errors.
