

MANAGING DIABETES IN THE EMERGENCY DEPARTMENT

AIM:

This topic is based on the **GIRFT (Getting It Right First Time) interactive pathways for staff working in the Emergency Department (ED)**. Depending on your selected level, it focuses on:

- ✓ **Essential safety checks** for people living with diabetes in the ED
- ✓ Management of patients admitted to the ED with **hypoglycaemia**
- ✓ Management of patients presenting to the ED with a **foot problem**
- ✓ Initial management of **hyperglycaemia** in adults in the ED

DURATION:

 This topic will take roughly **15-45 minutes to complete**.
