

CDEP is proud to have supported Hypo Awareness Week by offering healthcare staff access to our hypo training from 3-9 October 2022!

A phenomenal response in 7 days:

**1,203** topics completed

**1,607** new registrations

**5,600** users signed in

**8,800** bite-sized sessions

**76,000** pages viewed

#HAW2022

was a  
huge success!

We're especially proud of all the positive feedback:

*"It was very good training, easy to understand and very clear."*

*"I have furthered my knowledge of treating hypos within the hospital environment and I am now more familiar with the hypoglycaemia pathway. My confidence in treating hypos effectively has increased..."*

*"I find all of the sections that Cambridge offer so useful and being bite sized really does allow working professionals to be able to complete them."*

*"Much more knowledgeable now of the subject of HYPO'S. Improves my confidence knowing in how to handle the situation better."*

*"This section has been really helpful - it provided me, helpful information around hypos and its management. The scenarios are really useful."*

*"Better able to support patients with questions and in a ward setting have a better understanding about hypo management."*

*"This topic is a helpful guide to help in reducing prolonged hospitalization if not avoidance, which leads to less mortality risk."*

CDEP's online diabetes training is convenient, easily accessible and worthwhile. Sign in to [CDEP](#) and see for yourself!
