

USE OF HYBRID CLOSED LOOP IN PREGNANCY

REGISTER NOW

Speakers: Professor Helen Murphy and Dr Tara Lee

Date & time: May 16, 2024, 1 pm - 2pm BST

About

We will review recent diabetes technology advances which are transforming the management of diabetes before, during and after pregnancy. We will examine the benefits and barriers to using hybrid closed-loop (HCL) insulin delivery during type 1 diabetes pregnancy and focus on which systems deliver clinical benefits for mothers and babies. We will share practical tips for starting and optimising HCL use throughout pregnancy, including during labour and birth.

Learning points

- ▶ Understand the impact of HCL use on maternal glucose outcomes
- ▶ Understand which HCL systems offer clinically relevant time-in-range improvements
- ▶ Increase confidence starting and optimising HCL use during pregnancy
