

INPATIENT DIABETES SAFETY ESSENTIALS

AIM:

This short topic equips hospital staff with the key principles needed to provide safe inpatient diabetes care. Depending on selected CDEP level, it focuses on how to:

- ✓ Recognise, prevent or treat hyperglycaemia, DKA and HHS.
- ✓ Identify and manage hypoglycaemia safely in the inpatient setting.
- ✓ Use insulin safely to reduce medication errors and patient harm.
- ✓ Support the safe use of diabetes technology in hospital care.

DURATION:

 The online training will take roughly **30–45 minutes to complete.**

The completed topic will generate :

- **a certificate**
- **reflection form** for *revalidation* and *appraisals*
