

INJECTION TECHNIQUE

AIM:

This topic supports the safe administration of insulin or GLP-1 receptor agonist injection, reducing the risk of injection-related harm.

Depending on levels, it focuses on how to:

- ✓ Prepare the injection safely before administration.
- ✓ Select appropriate injection sites and use correct subcutaneous injection technique.
- ✓ Store, handle and dispose of injection equipment safely.
- ✓ Assess for lipohypertrophy and provide advice to improve injection-site health.

DURATION:

 The topic will take about **45-60 minutes to complete.**

The completed topic will generate :

- a certificate
- reflection form for revalidation and appraisals
